Anything the engineer needs to know

We bring all backline and the full drum kit — no house backline needed. Keys are stereo DI and need phantom power. Click and tracks run from a laptop at the drum riser; we'll take one spare XLR to FOH for it if you have a channel. Three of us are on in-ears and bring our own packs — we just need sends. Contact on the day: Sam, who answers the phone.

Filled-in example — the band is invented; the format is what matters.
